David Gadyan

Forward Deployed Engineer | Agentic AI Systems in Production | AI Consultant

Email: david.gadyan@bse.eu
Linkedin: linkedin.com/in/davidgadyan
Upwork: upwork.com/freelancers/davidgadyan
Portfolio: davidgadyan.com/portfolio

AI engineer and consultant with 8 years, 180+ delivered projects and 50+ long-term clients — every engagement customer-facing, from scoping to production and hand-over. Ships agentic systems that run in production: LangChain/LangGraph agents with MCP tool use into CRMs and external APIs, incl. a HIPAA-compliant underwriting agent (turnaround days → minutes).

PROFESSIONAL EXPERIENCE

Upwork (Freelancer) — **Remote · Yerevan, Armenia**
AI Engineer / Data Scientist — independent consultant, customer-facing delivery — 01/2018 – Present

- 8 years, 180+ projects for 100+ clients worldwide (50+ long-term); Upwork Expert-Vetted (top 1%), $500k+ earned, 8,700+ hours — working directly with CEOs, CPOs, CFOs and managing partners (references on portfolio).
- **Virgil.ai — agentic health-insurance assistant** — Built the production agent backend (LangChain + FastAPI + OpenAI, MCP tools, Docker/Kubernetes on AWS) with broker partner One Health: user onboarding, medication-coverage lookup and underwriting under HIPAA controls; underwriting cut from days to minutes.
- **LangGraph multi-agent document review** — Extended a law firm's due-diligence API with a LangChain + LangGraph multi-agent workflow on Gemini: user-defined checks instead of hard-coded prompts, ABN/ACN API validation, long-contract processing, Word report generation; handed over with docs and a replication package.
- **S1mple.ai** — Created an agentic AI platform (LangChain + GPT-4o, React) with custom tools and MCP support connecting client data, management and trading systems; extended it into an AI lead-scoring engine with MCP connectors into HubSpot/Monday/Zoho and PostgreSQL/MySQL/Supabase/MongoDB (Next.js, Kubernetes).
- **Technical lead for a client's AI team** — Consulted and mentored the client's AI engineers to build and deploy a hybrid recommender as a REST API on GCP; the team shipped it and runs it today in the live Chilldays app.
- **AI real-estate development platform** — Delivered end to end for a home builder: MLS scraper, XGBoost valuation model and a pro-forma engine scoring hundreds of lot-and-home-style scenarios with zoning and quota constraints enforced; handed over with full documentation and reproducible code.

Ernst & Young — **Yerevan, Armenia**
Tax Accountant — 10/2017 – 05/2018

- Tax compliance and internal-control reviews (Big-4) for a ~$10M-turnover client; 3+ concurrent engagements.

EDUCATION

Barcelona School of Economics — **Barcelona, Spain**
MSc Data Science for Decision Making (graduated with honours) — 09/2022 – 08/2023
Relevant courses: Computational Machine Learning, Deep Learning, Data Visualization · degree awarded by Universitat Pompeu Fabra and Universitat Autònoma de Barcelona

American University of Armenia — **Yerevan, Armenia**
Master of Business Administration — Finance, Data Science / Applications of Data Science — 09/2017 – 06/2020

LANGUAGES & TECHNICAL SKILLS

Agentic AI: LangChain, LangGraph, MCP (custom tools & servers), n8n workflow automation, OpenAI / Gemini / Claude APIs, prompt & few-shot engineering, RAG (Pinecone)

Integration & apps: Python, FastAPI, REST APIs, SQL (PostgreSQL, MySQL, BigQuery), CRM connectors (HubSpot, Zoho, Monday), Google Workspace APIs, Docker, Kubernetes, AWS, GCP · React, Next.js

Delivery: client scoping and stakeholder communication, documentation & replication packages, team mentoring and code review, HIPAA/GDPR-aware data handling

Languages: English (Fluent), Russian (Fluent), Armenian (Native), Spanish (Conversational)

ADDITIONAL INFORMATION

- *Upwork Expert-Vetted (top 1% of 10+ million developers), Toptal Developer · previously Big-4 (EY) · open source: reusable n8n AI-assistant workflow and AI video-generation pipeline published on GitHub*
